Employee  
Wage  
Computation  
Problem

# Outcome

1. Ability to work with Java Programming Constructs
2. Usage of Classes, Class Variables and Methods
3. Usage of Objects, Instances, Instance Variables and Methods
4. Usage of Collection Library
5. Ability to work with basic git flows.

**START**

Start with Displaying  
Welcome to Employee  
Wage Computation  
Program on Master Branch

**UC 1**

## Check Employee is Present or Absent

- Use ((RANDOM)) for Attendance Check

**UC 2**

## Calculate Daily Employee Wage

- Assume Wage per Hour is 20
- Assume Full Day Hour is 8

**UC 3**

## Add Part time Employee & Wage

- Assume Part time Hour is 8

**UC 4**

Solving using  
Switch Case  
Statement

**UC 5**

## Calculating Wages for a Month

- Assume 20 Working Day per Month

**UC 6**

Calculate Wages till  
a condition of total  
working hours or  
days is reached for  
a month

- Assume 100 hours and 20 days

**UC 7**

Refactor the Code  
to write a Class  
Method to Compute  
Employee Wage

- Use Class Method and Class Variables

**UC 8**

## Compute Employee Wage for multiple companies

- **Note:** Each Company has its own wage, number of working days and working hours per month
- Use Class Method with function parameters instead of Class Variables
